PROFESSIONAL SUMMARY

Aspiring Data Scientist with a Bachelor's degree in Artificial Intelligence & Data Science and strong expertise in Python, data analytics, and machine learning. Experienced in building predictive models, analyzing datasets, and extracting actionable insights. Achieved 95.87 percentile in Data Interpretation & Logical Reasoning in CAT 2025 (self-prepared). Passionate about leveraging data to drive business growth and innovation.

EDUCATION

B.Tech – Artificial Intelligence & Data Science
St. Martin's Engineering College

Intermediate – Narayana College (KPHB)

TECHNICAL SKILLS

Programming & Tools:
Python, SQL, Java, C++, Git

Data Science & Analytics:

- Data Cleaning & Preprocessing
- Exploratory Data Analysis (EDA)
- Regression & Classification Models
- Clustering & Association Rule Mining
- Model Evaluation Techniques
- Statistical Analysis

Libraries:
Pandas, NumPy, Matplotlib, Scikit-learn

Cloud & Development:
Google Cloud, AWS (Basics), Agile Methodology

PROJECTS

Human Action Recognition using Machine Learning

- Built ML models using smartphone accelerometer sensor data.
- Performed data preprocessing, feature engineering, and classification.
- Achieved accurate movement prediction using supervised learning algorithms.
- Extracted actionable insights from sensor datasets.

College Predictor Telegram Bot

- Developed a Python-based Telegram bot for predicting college admissions.
- Implemented logic using historical cut-off trends.
- Integrated user input handling and data-based decision making.

Cybersecurity Ecosystem Analysis

- Conducted analytical research on cybersecurity surveillance strategies in maritime ecosystems.
- Evaluated risk patterns and proposed data-driven security enhancements.

Python Mini Projects

Developed multiple projects demonstrating strong programming and logical skills:

- Data-driven Quiz System
- Information Management System
- Calculator & Analytical Tools
- Game Logic Simulations (Tic-Tac-Toe, RPS)

INTERNSHIP

Java & Industry Applications – NILTECH EDU
Nov 2024 – Dec 2024

- Worked on Java-based application development.
- Implemented logical structures and real-world problem-solving techniques.

- Collaborated in a structured development environment.

ACHIEVEMENTS

- 95.87 Percentile in Data Interpretation & Logical Reasoning – CAT 2025
- Strong mathematical foundation (Algebra, Statistics, Number Systems)

SOFT SKILLS

- Analytical Thinking
- Data Interpretation & Logical Reasoning
- Problem Solving
- Communication (Technical to Non-Technical)
- Adaptability & Time Management
